① Set up PIR Motion Sensor

To control the PIR Motion Sensor with a mobile device, install the Smart Life app. You can download the Smart Life app here.

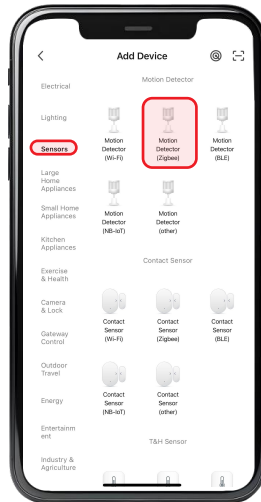

② Add PIR Motion Sensor

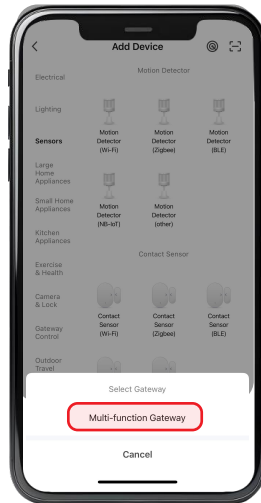

1. Launch the Smart Life app and follow the displayed instructions.
2. Add the gateway to the app according to the Multi-function Gateway Installation Guide.
3. Once the Multi-function Gateway is successfully added, click on "+" and select "Add Device".

4. Navigate to the "Sensors" category and choose "Motion Detector Zigbee".

5. Select your gateway.

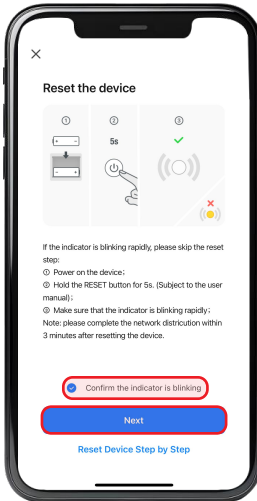

Note: The name of your gateway displayed in this section may differ from the name shown in this example image. It will display the name you have assigned to your device.

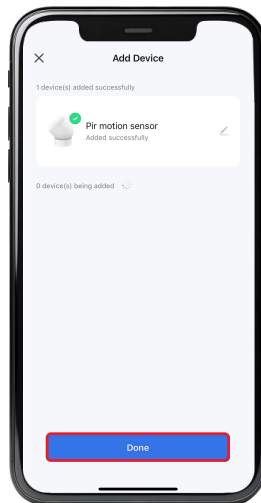

6. Turn the top cover of the product counterclockwise to open it. Remove the battery insulation strip. The blue LED will flash rapidly, indicating that the device has automatically entered pairing mode.

7. Select "Confirm the indicator is blinking" and click "Next".

8. Wait for the app to detect and initialize the device.
9. After the device is detected and its name appears, click "Done".

Congratulations!

Your PIR Motion Sensor installation is complete.
